

This comment is in regards to the time debate. I am a stay at home mom so I don't have work travel times to debate about. I do live in Walkerton, St. Joe County. To me this debate is nonsense. Elkhart County has it all wrong. We need to be Central time Zone. If you turn on the the Weather Channel, if we get a report from the National Weather Service, any news channel, for news or weather, when they refer to the east, do you hear them talk about Indiana? No, why is that? You have to wait until they talk about the midwest which is Indiana. Therefore Indiana being a mid-west state should belong on central time. Its as simple as pulling out a map, look where we are located, MIDWEST, NOT THE EAST!!! I think that it was crazy to let individual counties decide what zone they wanted. What was that all about?? Maybe we can convince Chicago to change to eastern also, so what if they are in the midwest. Common sence isn't being used here so lets just go to more extremes. Why not let everyone in the U.S. be eastern?? Stupid huh!! Just as stupid as putting St. Joe in the eastern time zone, we are located in the midwest which is central time zone. Thank you for your time in reading this. I pray you will make the correct decision which is CENTRAL TIME ZONE FOR US ALL!!!
